Education

Bachelors Of Computer Engineering and Business Management, University of Ottawa, 2014-2019

Programming Skills

• ReactJS • Java • JavaScript/TypeScript • Jest • HTML/CSS • SQL • Python • C# • GraphQL • Azure • REST API

Employment Experience

Software Engineer II

Jan 2022-Ongoing

Microsoft

- Successfully designed and implemented essential features, pages, and functions for the Microsoft Viva learning platform, consistently meeting production release deadlines.
- Orchestrated full life-cycle development of multiple projects including the HR Profile data and Viva Skills editor.
- Contributed to the improvement of the project's codebase and functionality through numerous successful code reviews and pull requests, resulting in the integration of high-quality code for millions of users.
- Proactively identified and resolved various bugs and accessibility issues, enhancing the overall user experience and ensuring optimal performance.
- Onboarded new teams and clients, leveraging my subject matter expertise to smoothly transition them into application.

ReactJS, TypeScript, NodeJS, Azure, C#, Redux

React Intermediate FullStack Developer, Contract

Apr 2021-Jul 2023

Almi Digital Insurance

- Spearheaded the development, maintenance, and support of a large-scale insurance application, actively contributing to both the Front End and Back End components.
- Demonstrated a strong commitment to code quality by conducting multiple code reviews, ensuring consistency with the existing code base and minimizing the occurrence of potential bugs.
- Enhanced the testing process by creating API endpoints that simulated user workflows for different use cases, resulting in a significant reduction in testing time and streamlining the workflow testing procedure.

ReactJS, TypeScript, NodeJS, SCSS, MongoDB, Docker, GraphQL, Azure

Business Solutions Specialist

Jul 2020-Jan 2022

Town of Ajax

- Collaborated with stakeholders and IT staff to select, implement, and maintain corporate applications, ensuring smooth operations and upgrades.
- Supported multiple system interfaces and corporate databases for seamless integration and efficient performance.
- Developed and implemented innovative corporate solutions and web applications, optimizing user experience and workflow efficiency.
- Utilized and designed advanced SQL queries to generate customized reports meeting diverse client needs.

SQL Server, Oracle WebSphere, Apache Maven, HTML/CSS, ASP.Net

Frontend Developer, Contract

Jun 2020-Nov 2020

ReadyBloom

- Played a pivotal role as the primary front end development resource during the initial phase of the startup.
- Demonstrated expertise in developing and designing multiple components and pages for the fleet management application.

ReactJS, JIRA, MongoDB, MaterialUI, NodeJS, NextJS, REST

Software Associate

Nov 2019-Jul 2020

CAPCO

- Performed Load Testing and Performance Testing for several Bank of Montreal IVR's
- Developed API mocks using extensive data sets to simulate thousands of users, enabling comprehensive End to End and performance testing.
- Troubleshoot issues, recorded test scripts, and converted JUnit scripts to JMeter scripts for Load Testing purposes.
- Maintained a consistent workflow by making daily commits to the company repository.

Java, JUnit, WireMock, Apache Maven/Tomcat/Jmeter, REST, Charles Proxy Server
